

STEPS TO UPDATE MENU AND WEBSITE

- 1) Open “positano” folder, wherever you keep it.
- 2) Open “assets” folder, then “menu” folder
- 3) Paste or drag and drop new menu file also named “menu.pdf” in this folder, and overwrite the old file.
- 4) Log into your Netlify account [here netlify.com](https://netlify.com)
- 5) Click on positanos site
- 6) Click “Deploys” tab at the top
- 7) Drag and drop or select entire “positano” folder in the marked area (scroll down to see images)
- 8) May take a couple minutes, but then your site will be updated!
- 9) If old menu is still displaying on your phone or computer but you overwrote the file, clear browsing data. That will fix it.

Deploys for positanos
