STEPS TO UPDATE MENU AND WEBSITE

1) Open "positano" folder, wherever you keep it.

2) Open "assets" folder, then "menu" folder

3) Paste new menu file also named "menu.pdf" in this folder, and overwrite the old file.

4) Log into your Netlify account [here](netlify.com) netlify.com

5) Click on positanos site

6) Click "Deploys" tab at the top

7) Drag and drop or select entire "positano" folder in the marked area

8) May take a couple minutes, but then your site will be updated!

9) If old menu is still displaying on your phone or computer but you overwrote the file, clear browsing data. That will fix it.
